

Greenly Guides

x Microsoft Suppliers

How Greenly guides suppliers with Microsoft's Procurement Sustainability Assurance Guidance, measuring Scope 1, 2, 3.1 through 3.8 and providing an assurance/consultant letter.

Carbon reduction trajectory

Current net emissions: 1000 tCO2e (2022 year)
 Predicted net emissions: 700 tCO2e (2026 year)
 Objective Emissions Reduction: -300 tCO2e

Objectives: Paris 1.5, Paris 2.0, Custom (selected)

Scenario 2: Emissions per year, Emissions per reduction action, Cost

CO2 Emissions: Current Emissions, Future Emissions, Target Emissions

Reduction by 300 tCO2e objective reached (2024)

Microsoft suppliers

Greenly helps Microsoft suppliers meet new sustainability standards by providing tools for emissions tracking and reporting. As Microsoft requires detailed Scope 1, 2, and 3 emissions reports and 100% renewable energy by 2030, Greenly's carbon accounting software simplifies compliance. This ensures accurate, transparent data submissions and emissions reduction plans, helping suppliers avoid compliance issues and maintain business partnerships.

Companies that Greenly has helped with Microsoft's Procurement Sustainability Assurance Guidance

Partnership on AI
 AI research services nonprofit
 (30 employees)
